2007-2010 New Hampshire Statewide Transportation Improvement Program **Financial Plan**

According to the requirements of the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy For Users (SAFETEA-LU), the New Hampshire Department of Transportation's (NHDOT) Statewide Transportation Improvement Program (STIP) shall include projects, or identified phases of projects, only if full funding can reasonably be anticipated to be available for the project within the time period contemplated for completion of the project.

The purpose of this plan is to demonstrate how the approved STIP can be implemented, indicating the resources that are reasonably expected to be made available to carry out the projects within the STIP for needed projects and programs. This plan identifies the underlying assumptions and principles in the STIP Financial Constraint Process, and compares these assumptions with past actual details to reinforce the validity of the assumptions.

Overall Funding in the STIP

Through this plan, NHDOT ensures that all projects are funded using a variety of resources, including but not limited to, federal revenues (with appropriate other match amounts) received from FHWA as outlined in SAFETEA-LU and appropriated by Congress each fiscal year, and other state/local revenue sources as budgeted and appropriated. Most FHWA funds require up to a 20% state or local match. NHDOT has used hard match (state or local), soft match (state or local), turnpike toll credits, and advance construction to fund the projects as shown here in the STIP document.

The NHDOT STIP Financial Constraint process is based on the following principles:

- All Federal Funds obligated will be appropriately matched by state funds, local funds or through other techniques that will be further explained in this document.
- STIP Financial Constraint is based on Apportionments received in NH. It has been recommended by FHWA that NHDOT constrain to this level based on federal financial constraint guidelines and regulations.
- Federal Apportionments for FY 2007-2010 for the purposes of this STIP Financial Constraint are projected to be at the same levels of FY 2006. Although SAFETEA-LU passed certain authorizing levels that may be higher through FY 2009, it is felt that this constraint should be based on what NHDOT has actually been receiving.
- There are federal funds received prior to FY 2007, that carryover into FY 2007 and beyond that are not accounted for as part of the Constraint Analysis, when based strictly on the Apportionments received in a Fiscal Year. As a result, in the detailed constraint analysis that follows, it must be recognized that there are funding categories that have more available to authorize than just the Apportioned funds predicted.
- NHDOT only obligates funds to the prescribed levels NHDOT is given. It is important to note that Obligational Authority (the amount NHDOT can actually authorize) is typically 85-90% of the Apportionment levels and can be adjusted by other factors such as federal rescissions and redistribution of obligational authority not used by other States.

- All projects funded in the STIP are represented in the STIP Financial Constraint.
- State Match (Hard Match and Soft Match) budgeted for FY 2007-2010 will be as submitted in NHDOT's requested operating budget through FY 2009 then level funded in FY 2010
- Though local match is typically not contained within NHDOT's operating budget and is entirely based on the schedule of projects to occur, NHDOT does not advance a locally matched project without written assurances from the local community/organization that such funding is available.
- Advance Construction is used if/when federal funds run short of meeting NHDOT needs. A further discussion of Advance Construction is included below.
- Turnpike Toll Credits could be used to provide the non-federal match requirements of a project. A further discussion of those funds is provided below.
- A detailed listing of funding needs and anticipated federal revenues is presented as part of this plan. The listing may show projected negative balances of funds in some categories and are acceptable for this analysis for the following reasons:
 - Projected apportionments do not account for balance carryovers of remaining balance from one fiscal year to the next
 - Flexible funding provisions of the federal funding by FHWA will allow for easy use of other appropriate funds at time of obligation,
 - Every effort made to program only eligible funds on federal aid projects (e.g. Bridge funds will not be programmed on a project not eligible for federal funding)

Advance Construction

NHDOT attempts to fully fund all federally eligible projects with federal funds (and applicable match). However, when NHDOT has exhausted available federal funds, federal regulations allow NHDOT to "Advance Construct" projects. Under this process NHDOT funds a federally eligible project with State Funds, with prior notification to and approval from FHWA to do so, and then asks for the future inclusion of federal funds when those funds are available.

NHDOT does not specifically identify projects to be Advance Constructed as part of the STIP process, but does when the specific request for funding is actually made to FHWA. However, there are general guidelines that NHDOT follows in order to estimate and anticipate Advance Construction needs each year:

- Federal funds will be obligated throughout the fiscal year until such funds are exhausted and then remaining projects will be advance constructed.
- Through the NHDOT Bureau of Finance and Contracts, NHDOT knows how much in state highway funds are available when Advance Construction funds are used, and NHDOT does not fund more in Advance Construction than is available in the State's highway fund.
- Twice monthly NHDOT publicly publishes a Project Advertising Schedule identifying the date and cost of projects (including federal funds) to be advertised. Using this document, NHDOT can predict which projects may use Advance Construction funds based on the following items:

- Look at the last 2-3 months of the Advertising Schedule for a fiscal year, and add projects backwards until the federal dollars advertising approximately total the Advance Construction needs as identified in the STIP Constraint.
- When looking at the first 2-3 months of the Advertising Schedule for a fiscal year, projects advertising in this timeframe will also typically need to be advance constructed to account for lag of new appropriations of federal funds.

In addition, once federal funds are available, NHDOT will “convert” those advance construct project funds to federal funds to take advantage of the federal participation.

NHDOT’s Bureau of Finance and Contracts closely monitors the status of the Highway Funds working with the State Treasurer and other agencies that also use these funds. If Finance were ever to indicate that funds would not be available at the historical levels that have been seen over the last number of years, then NHDOT would need to revisit the STIP Financial Plan and modify it as necessary. The Bureau has indicated that, assuming that the remainder of FY 2007 is funded at current levels, there would be approximately \$30M in cash available to Advance Construct. With a balanced budget for FY 2008-2009, this level would remain about the same.

Turnpike Toll Credits

Federal regulations allow a State to use toll credits toward the non-Federal match requirement of a project for any funds made available to carry out projects contained in the STIP. These credits are based on toll revenues that are generated and used by public, quasi-public, and private agencies to build, improve, or maintain highways, bridges, or tunnels that serve the public purpose of interstate commerce. Such public, quasi- public, or private agencies shall have built, improved, or maintained such facilities without Federal funds.

To receive these Turnpike toll credits, a State shall show that it has maintained its non-Federal transportation capital expenditures in accordance with the given requirements. NHDOT has shown that they have met these requirements in the past, and has utilized turnpike toll credits to match federal funds, and has more available to match federal funds (if local or state match were not available).

The usage of toll credits is determined by the Commissioner’s Office at NHDOT as a directive to the financial staff responsible for the authorization of federal funds and the ongoing monitoring of those funds. The decision is made based upon the state’s ability to match project funds with “hard match”. The Department would rather use state hard match to stretch the federal funds received as much as possible, without sacrificing projects from moving forward.

State Budget Process as it Relates to State Matching Funds

State Law requires that every other year, starting with an agency’s submission to the Governor’s Office in September of the odd year (September 2006), that an operating budget is recommended by each agency on what will be needed to fund all priority programs and services. Per RSA 9:4,

two submissions are to be made: a maintenance-level request and a change-level request, with a focus on defining results-oriented outcomes. By June 30 of the following even numbered year, the Governor and Legislature make the final recommendations and approvals of the agency budgets, based on their reviews, and the normal legislative process.

The maintenance request must be a strict interpretation of RSA 9:4 and provide for the continuation of current programs at the same level of service authorized and funded in the preceding fiscal year. The change request may include agency recommendations for new or improved programs that the agency believes are necessary for the efficient operation of the agency and that will result in measurable, achievable outcomes that can be measured against competing priorities. Budget changes must be explained in detail with specific information (caseload data, changes in federal or state law, etc.) supporting the request.

Agency budgets are to be built from the bottom-up using a zero-based budgeting approach. With this zero-based budgeting approach, it is ensured agencies review all program areas. This should aid in prioritization, determining the effectiveness of programs and identifying areas where efficiencies can be achieved.

NHDOT budgets anticipated federal revenue, state hard match and local hard match as part of the above-mentioned budgeting process. Soft match is also budgeted as part of the budget process, but not called out as a line item in the budget. NHDOT's Bureau of Finance and Contracts calculate budgeted soft match. Budgeted federal revenues are based on historical federally reimbursed expenditures. These revenues are not directly tied to anticipated apportionments or obligational authority because expenditures can be occurring at a very different rate than apportionments.

For STIP planning purposes, the already approved FY 2007 budget and submitted 2008-2009 budget is the best information NHDOT has available as to anticipated state and federal revenue, as well as total expenditures that are planned as part of the budget. If there were changes in the budgeted amounts within NHDOT's budget for federal aid projects, then it would be appropriate for the STIP Financial Constraint to be updated, adjusting project schedules to meet the projected revenues. Any project changes in the STIP would require appropriate amendments, including coordination with MPO's, FHWA, FTA, EPA and other agencies as required. Historically, the Department's federal aid program has been well received by both the Governor and Legislature, and has not been changed from the recommended agency budget.

Historical Funding Levels

The table below indicates levels of funding actually received, used and/or reported in the last five years to address the concepts discussed above.

Year	<u>FHWA</u> <u>Apportionment</u>	<u>Federal Funds</u> <u>Obligated</u>	<u>Total Advance</u> <u>Construction</u> <u>Funds Used</u>	<u>State Highway</u> <u>Fund Cash</u> <u>Available to</u> <u>Advance</u> <u>Construct</u>	<u>Total Toll</u> <u>Credits Used</u> <u>(2002-2006) or</u> <u>Available to</u> <u>Use (2007-</u> <u>2010)</u>
